As a dedicated technical lead with extensive experience in developing, integrating, and supporting applications, I have consistently delivered high-quality solutions that enhance productivity, efficiency, and security. My goal is to apply my technical expertise and project management experience to contribute to innovative projects that create real impact and to be as useful as possible to my team.

Work Experience

Programmer/Analyst III – Tucson Electric Power | September 2025 – Present

- Serve as acting team lead, covering the team's supervisory and planning functions during an extended absence of the team supervisor.
- Manage portfolio planning for my team, including project prioritization and resource allocation.
- Work directly with business leaders to plan and develop project roadmaps.
- Partner with IT leadership to identify existing SaaS and on-premise applications replaceable by internally-built AI applications, targeting reduced software spend.
- Advance company-wide AI adoption as a leading contributor to the internal Community of Practice and the company's AI training program.
- Stepped in as Project Manager mid-way through a new implementation for our Environmental Compliance team, keeping it on schedule and within budget.
- Remained hands-on in development and production support.

Programmer/Analyst II – Tucson Electric Power | March 2021 – September 2025

- Developed production .NET Blazor web applications integrating with several other internal systems.
- Locally hosted various Large Language Models with custom RAG using Docker, Ollama and WebUI.
- Automated and integrated multiple systems to enhance efficiency using PowerShell.
- Created Splunk dashboards to provide my team with near real-time metrics on server and application performance.
- Monitored and supported production servers using vSphere.
- Maintained software licensing and compliance.
- Led server migrations and upgrades, both CIP and non-CIP.
- Trained new-hires on internal systems, processes and CIP regulation.
- Continued to perform all functions of the previous role.

Programmer/Analyst I – Tucson Electric Power | May 2019 – March 2021

- Served as the Technical Lead on multiple large projects, collaborating directly with stakeholders.
- Implemented and supported Critical Infrastructure Protection (CIP) applications and servers.
- Developed Java Spring web applications integrated with Oracle databases.
- Created dozens of automations/scripts, saving thousands of man-hours.
- Developed application integrations using Python and PowerShell.
- Updated and maintained C#/ASP.NET web applications.
- Provided advanced support for over 100 applications including multiple work-management apps.
- Subject Matter Expert for Autodesk Vault Professional.

Web & Mobile Team Student Intern – Tucson Electric Power | March 2018 – May 2019

- Developed an internal Java Spring web application with a REST API and Spring Boot CLI.
- Created unit tests for Java and Spring applications using JUnit and Mockito.
- Gained CI/CD experience using Jenkins, integrating builds with GitHub, Sonar, and Nexus.
- Automated Angular JavaScript testing and release builds using Jenkins and Karma.
- Developed and modified Python scripts for API implementation.
- Led Client Needs Assessments (CNAs) and participated in UATs and QA testing.
- Documented software for end users and support technicians.

Skills

- **Languages:** Python, Java, C#, SQL, PowerShell, TypeScript
- **Frameworks & Libraries:** .NET, React, Blazor, MudBlazor, Flutter, Django, FastAPI, Spring, Autodesk Vault Pro SDK
- **Databases:** PostgreSQL, Oracle, SQL Server
- **Cloud & DevOps:** AWS, Microsoft Azure, Git, Docker, Jenkins CI/CD
- **AI / LLM:** Ollama, Palantir Foundry, Claude Code, OpenAI Codex, OpenAI API
- **Platforms & Practices:** Splunk, vSphere, ServiceNow, Windows Server, Agile, Project Management, CIP Regulation, Stripe API

Certifications

CompTIA Project+

Completed: August 2024

AWS Certified Cloud Practitioner

Completed: August 2024

Education

Bachelor of Science | Software Engineering

Western Governors University

Completed: Dec 2024

Associate of Applied Science | Computer Programmer/Analyst

Pima Community College

Completed: May 2019
